

**List of 38 Low-altitude Economy  
Regulatory Sandbox (“Sandbox”) Pilot Projects to be Implemented**

After review by the Working Group on Developing Low-altitude Economy (“WG”), a total of 38 projects will be included for implementation in the first batch of the LAE Regulatory Sandbox. The implementation is contingent upon the applicants' acceptance of the approved conditions, which include, but are not limited to, routing, testing parameters, and timeframes that may differ from those outlined in the submitted applications.

The Project Facilitation Task Force (“TF”) under the WG will liaise with the applicants and coordinate among various technical departments for the implementation of Sandbox projects. Based on the feasibility and readiness of the projects, implementation will take place in batches. With safety being the top priority, the TF will adopt a progressive approach to pilot projects, in terms of flight path, route planning, flight distance, etc, in order to ensure safety of low-altitude flying activities.
