

Elevated walkway work scheme in Tseung Kwan O gazetted

The Government published a notice in the Gazette today (May 20) on the elevated walkway between Tong Ming Street and Tong Tak Street, Tseung Kwan O. The scheme has been authorised by the Chief Executive in Council.

The proposed work includes construction of an elevated walkway of approximately 180 metres long connecting the existing footbridge leading to Sheung Tak Shopping Centre and the future Tseung Kwan O Station development; provision of two lifts, one at each end of the proposed elevated walkway; permanent closure and demolition of an existing footbridge ramp; permanent or temporary closure of sections of the existing footpath, footbridge and carriageway; conversion of sections of the area underneath the existing footbridge ramp into footpath, landscape area and cycle parking area; conversion of a section of the existing footpath into a planter; and ancillary works such as associated ground level works, landscaping, drainage and electrical and mechanical works.
