Tsang

Dear Sirs

I am writing setting out some of my comments on the current hot topic of the privatisation of the Airport Authority.

I am in support of such a privatisation, however, from the recent press, I noticed that the Authority is facing many objections and pressure from the major airlines.

I understand that the main objection arise from the increase in airport charges. I do not agree that passengers should pay for such an increase. I can see that such increase is directly conflicting with the commercial interests of the airlines. However, these major airlines are making huge amounts of money and should bear these expenses.

Finally, the listing of the Authority will bring greater financial and economic reward to the people of Hong Kong.
